**#Fact Check**

Japan's professor of Physiology or Medicine, Professor Tasuku Honjo, created a sensation in front of the media today by saying that COVID-19 is not natural. If it is natural, it wouldn't have adversely affected only China. This is because, as per nature, temperature is different in different countries. If it were natural, it would have adversely affected only those countries having a similar temperature as China. Instead, it is spreading in a country like Switzerland, in the same way it is spreading in the desert areas. Whereas if it were natural, it would have spread in cold places, but died in hot places. I have done 40 years of research on animals and viruses. It is not natural. It is manufactured and the virus is completely artificial. I have worked for 4 years in the Wuhan laboratory of China. I am fully acquainted with all the staff of that laboratory. I have been phoning them all, after the Corona accident, but all their phones are dead for the last 3 months. It is now understood that all these lab technicians have died.

Based on all my knowledge and research till date, I can say this with 100% confidence that Corona is not natural. It has not come from bats. China has manufactured it. If what I am saying today is proved false now or even after my death, the government can withdraw my Nobel Prize, but China is lying and the truth will one day be revealed to everyone.

Every once in a while we get strange forwards, but can't vouch for its credibility but some of the info makes sense.
